## Angular 2 Grid Demo

This is a simple demo used for creation/testing of `angular2-grid`, a grid-based drag/drop/resize plugin directive for `Angular 2`. It makes use of angular directives so that in order to include it, all you need to do is add an "[ng-grid]" attribute to your container and an "[ng-grid-item]" to each of your grid items. It even works with the For directive to add boxes on the fly!

*Disclaimer: For best results, please don't use IE (or Edge). Naturally*

Fix to Grid  Draggable  Resizable  Auto-Resize Rows/Columns  Cascade Direction Up ▾

Column Width  Row Height  Margins

Minimum Column Width  Minimum Row Height

Max Columns  Max Rows

Min Columns  Min Rows

Get Item Position & Size 1 ▾ Col: 1, Row: 1, Size X: 1, Size Y: 1
